EDUCATION

Douglas College

New Westminster, BC

Post-Baccalaureate Diploma in Computer Information Systems and Data Analytics

May 2022- Feb. 2025

- Graduated with Gold Cord distinction (GPA: 3.90); Dean's List and Honour Roll.
- Relevant Coursework in: Machine Learning, Data Analytics, Databases SQL and NoSQL, Data Visualization (Tableau and Power Bi), Business Statistics, Software Engineering, Data Structures and Algorithms.

University of Valle

Cali, Colombia

BSc in Physics

Aug. 2012 – Jun. 2017

- Undergraduate Thesis: "General Formalism of Gravitational Perturbations and Scalar Spectral Index in Cosmic Inflation Models.
- Cumulative GPA: 4.21/5.0; 5-time Academic Excellence Awardee

EXPERIENCE

Bilingual Physics Teacher

Aug 2021 – Mar 2022

Redcol Holding

Colombia

- Designed a data-driven curriculum in English, improving national exam scores by 11%.
- Conducted data analysis to assess student performance and inform teaching strategies.

Physics and Math Teacher

July 2018 – Aug 2021

Grupo Hermanos Pardo

Colombia

- Applied statistical methods to evaluate test reliability and improve assessment quality.
- Optimized workflows for educational material delivery, increasing engagement and efficiency.

Teacher and Academic Coordinator

Aug 2017 – July 2018

University of Valle

Cali, Colombia

- Led the creation of educational guidelines and innovative lab sessions to simplify complex physics topics.
- Provided training and guidance to junior teaching staff, improving instructional effectiveness.

PROJECTS

Energy Demand Forecasting | *Python, Pandas, Matplotlib*

- Processed smart meter and behavioral survey data, applying feature engineering and time-series transformations for forecasting.
- Developed models (KNN, ANN) to analyze energy consumption trends and behavioral influences.

ETL Pipeline for CSV Processing (In Progress) | *DBT, Airflow, Azure Blob Storage*

- Developing an automated ETL pipeline to transform raw sales data using DBT and store results in Azure Blob Storage.
- Implementing Apache Airflow to orchestrate data workflows and schedule transformations.

NER for Job Market Analysis | *Hugging Face Transformers, Python, NLP, Selenium*

- Scraped and structured job postings from Google Jobs, extracting key details (titles, skills, salaries).
- Built NLP pipelines to clean and categorize text data, identifying industry skill demand trends.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, Java, C#

Data Processing: Pandas, NumPy, Data Cleaning, Feature Engineering

Databases: SQL Server, MySQL, MongoDB

Data Engineering (Currently Learning): DBT (Data Build Tool), Apache Airflow, SQL Optimization

Back-end Development: Experience integrating databases with Full-Stack applications

Cloud (Currently Learning): Azure Blob Storage

Visualization: Power BI, Tableau, Matplotlib

Tools: Git, Excel, Azure
